

International Conference on Sustainable Biofuels 2018

"A joint event of Mission Innovation and Biofuture Platform"

EXHIBITOR'S GUIDE FOR STALLS

The International Workshop on Sustainable Biofuels will be held at India Habitat Centre in New Delhi, India on 26th and 27th February 2018. The conference is jointly organised by **Department of Biotechnology**, Ministry of Science and Technology, India; **Mission Innovation, India** and **Biofuture Platform**.

The conference – organized in accordance with the mandate derived from the countries in the Biofuture Platform conference (São Paulo, October 2017) – will call attention to the need (increasingly evident in climate and econometric models, scenarios and projections by agencies such as IEA, IRENA and REN21, among others) to scale up sustainable bioenergy in order to keep the globe within agreed temperature level rises, and further discuss lessons on how to achieve that.

By joining forces, there will be a rich opportunity to communicate **to decision makers, project developers, businesses, researchers and financiers**; the significant technological advances and commercial successes achieved globally in the field of Biofuels. The conference will embody the spirit of international networking and exchange of ideas on an array of Biofuel topics.

Why exhibit?

- Focus – Provide a base to interact with an international audience. Generate new business for your products and services.

- Network – Our exhibition booths are located in the heart of the networking and catering areas giving you the opportunity to network with colleagues, potential customers and leaders in biofuel research and development.
- Branding - Raise your company's visibility, increase your brand awareness and highlight your company's presence as an active and important player in the field.
